CLAIMS

14
5. A method of making a medicinal substance, consisting of the steps of providing a material carrier in form of an active medicinal substance in therapeutic dose; providing a potentiated medicinal substance produced by a homoeopathic method from an initial substance possessing a chemical formula and a composition identical to those of the active medicinal substance; and bioenergetically transferring information providing a potentiated medicinal substance produced by a homeopathic method from an initial substance possessing a chemical formula and a composition identical to those of the active medicinal substance; and bioenergetically transferring information from the potentiated medicinal substance to the material carrier.

15
6. A method as defined in claim 5, wherein said transferring includes placing the material carrier and the potentiated medicinal substance in different and transferring the information electrically from the vessel containing the potentiated medicinal substance to the vessel containing the material carrier.

16
7. A method as defined in claim 5, wherein said transferring includes impregnating the material carrier with the potentiated medicinal substance.

17/8. A method as defined in claim 5, wherein said transferring includes dissolving the potentiated medicinal substance in the material carrier.

18/9. A method as defined in claim 5, wherein said transferring includes introducing the potentiated medicinal substance into the material carrier formed as a paste.

19/10. A method as defined in claim 5, wherein said transferring includes introducing the potentiated medicinal substance of a material carrier simultaneously into an organism.

20/11. A medicinal substance consisting of the steps of providing a material carrier in form of an active medicinal substance in therapeutic dose; providing a potentiated medicinal substance produced by a homoeopathic method from an initial substance possessing a chemical formula and a composition identical to those of the active medicinal substance; and bioenergetically transferring information providing a potentiated medicinal substance produced by a homeopathic method from an initial substance possessing a chemical formula and a composition identical to those of the active medicinal substance; and bioenergetically transferring information from the potentiated medicinal substance to the material carrier.

21
12. A medicinal substance as defined in claim 11, wherein said transferring includes placing the material carrier and the potentiated medicinal substance in different and transferring the information electrically from the vessel containing the potentiated medicinal substance to the vessel containing the material carrier.

22
13. A medicinal substance as defined in claim 11, wherein said transferring includes impregnating the material carrier with the potentiated medicinal substance.

23
14. A medicinal substance as defined in claim 11, wherein said transferring includes dissolving the potentiated medicinal substance in the material carrier.

24
15. A medicinal substance as defined in claim 11, wherein said transferring includes introducing the potentiated medicinal substance into the material carrier formed as a paste.

25
16. A medicinal substance as defined in claim 11, wherein said transferring includes introducing the potentiated medicinal substance of a material carrier simultaneously into an organism.
